NaturaLight

Light Technology at Its Best

Excessive hair can be embarrassing or unsightly. Now there are techniques to remove unwanted body hair, quickly and gently, making you feel more confident.

How is the NaturaLight procedure different from other hair removal procedures?

- Tweezing is slow, temporary and suitable only for small areas.
- Shaving requires regular daily maintenance and can irritate skin.
- Depilatory creams are messy and offer temporary solutions.
- Waxing may be painful.
- Electrolysis can leave scarring, is painful and time-consuming.

Where on the body can the NaturaLight be used for hair removal?

We can target a small area such as your chin or upper lip, or larger areas like your back or legs for safe, effective hair removal.

What are the benefits of hair removal using NaturaLight?

- Excellent, rapid results.
- Nonsurgical, noninvasive procedure.
- Leaves no scarring.
- Small or large areas can be treated.
- Speedy recovery
